

Crown joins the Comdata Fuel Consortium (CFC) Network
Thursday, May 15, 2014

The Comdata Fuel Consortium (CFC) is expanding again, offering even more locations for our Comdata MasterCard® Corporate Fleet Card customers to earn automatic price-per-gallon discounts at the fuel pump. The CFC is our nationwide network of more than 30,000 retail fueling locations that offer this benefit to our customers, helping fleets save money and merchants increase traffic to their sites.

Crown, a wholly-owned subsidiary of Clark Brands, LLC, is the latest merchant addition to the CFC. By joining the program, Crown will add 91 new locations to the CFC network and will offer Comdata customers a per-gallon retail discount on diesel and unleaded fuel purchases.

With the addition of Crown, Clark Brands will now have a total of 544 locations in 29 states on the CFC Network. A list of all locations on the CFC network is available [here](#). Detailed information on physical locations and current retail pricing available at each CFC merchant location is available through Comdata's [SmartBuy](#) system.

Clark Brands licenses the Clark and Crown family of brands to independent petroleum marketers and retailers. The company also licenses the On The Go and Fast Fare convenience store brands. For more information, please visit www.clarkbrands.com or call 1.877.462.5275.
